Manzano Day School

January 14, 2014

Mr. Justin Taibbi
Atlas Electrical Construction, Inc.
PO Box 93024
Albuquerque, NM 87199

Dear Justin:

I'm taking this opportunity to express my appreciation for all the work Atlas has done for Manzano Day School. Beginning in 2008 with the renovation of our lower school classrooms, you participated in the design and build of the electrical system and technology upgrade. When you expanded the electrical service you planned for the addition of a new building and expansion of service in our other buildings.

In 2010 you were the electrical contractor for our new gymnasium. There were problems to be solved to tie the system into the rest of the campus and integrate the fire alarms. The problems were solved with grace and efficiency.

Last summer Atlas designed and executed the rewiring of the electrical and telecomm systems linking the multi-purpose building to our three hundred year old building, La Glorieta. This work was done in anticipation of the La Glorieta roof project that we are working on now.

We especially appreciate your firm's concern for security and safety on our elementary school campus. Your electricians and engineers are respectful and always set a good example. Your work is completed on time and at the quoted price. When you encounter challenges, you devise solutions. Your firm is responsive on service calls.

It is a pleasure to work with you.

Sincerely,

Elizabeth Foster
Director of Finance and Operations

Neal Piltch
Head of School
