RE: 862: NM School for the Deaf-Dillon Hall

SUBJECT: Good Job!!!

CC:

On 0/25/12 Star conducted a Substantial Completion Walkthrough and turned the NM School for the Deaf Dillon Hall project over to the Owner for beneficial occupancy. They are extremely pleased with the finished product. We can all be extremely proud of the beautiful result of all our hard work.

This was an EXTREMELY challenging project to accomplish given the challenges presented. We recognize just how difficult and challenging this project was at times and are grateful for the cooperation from your firm in bringing this project to its final completion. We are also extremely pleased that no major accidents or incidents occurred during the project.

Therefore, I want to express to you and your firm our gratitude for a job well done. In many cases, performance above and beyond the norm was required by the parties involved. Your firm's willingness to step up shows the caliber of the firms employed for this project. Please extend a heartfelt "Attaboy" to all of your personnel and second-tiers that participated in this project. Thanks again for all your hard work! We look forward to working with your firm again in the future.
